Tainted Love to us is as perfect a cow as we can get for our program. She has the perfect body for easy keeping and our grass-fed program. She has beautiful color and ideal twisty horns. She is part of our original herd and will be a part of our family forever. She passed away at 18 years old with a heifer by her side. She is on our wall and will always be cherished. We have injected as much of her DNA into our herd as possible through her son, Little
